

PRAG RANGE DESCRIPTION

DESCRIPTION

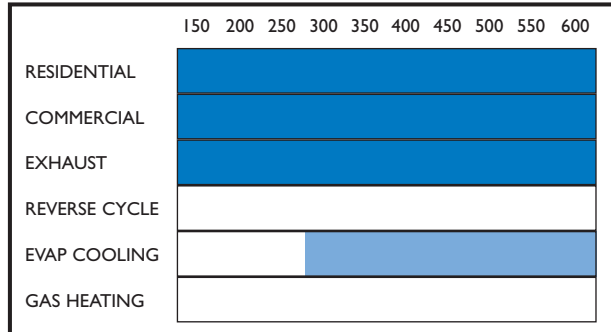

This RETURN AIR GRILLE combines practical modular design and incorporate the latest filtration technology. The quick release mechanism allows the grille to be disassembled in seconds to facilitate cleaning as required.

Grille modules are manufactured from POLYREX high impact styrene and will not corrode, fade, chip or discolour, and are dishwasher safe.

FELTCREST flexible polyurethane foam has been selected as the filter media for it's internationally recognised standards. With a high compression ratio offering more cells per square millimetre than other similar products. The result is an extremely rigorous path and increased level of impingement surfaces presented to trap particulate matter, allowing clean filtered air to recirculate through the system.

Produced in a range of sizes to suit all applications, the grilles are suitable for both wall and ceiling mounted applications with clips supplied for both types of installation.

APPLICATION SELECTOR

CODE:

- HIGHLY RECOMMENDED
- SUITABLE
- NOT RECOMMENDED

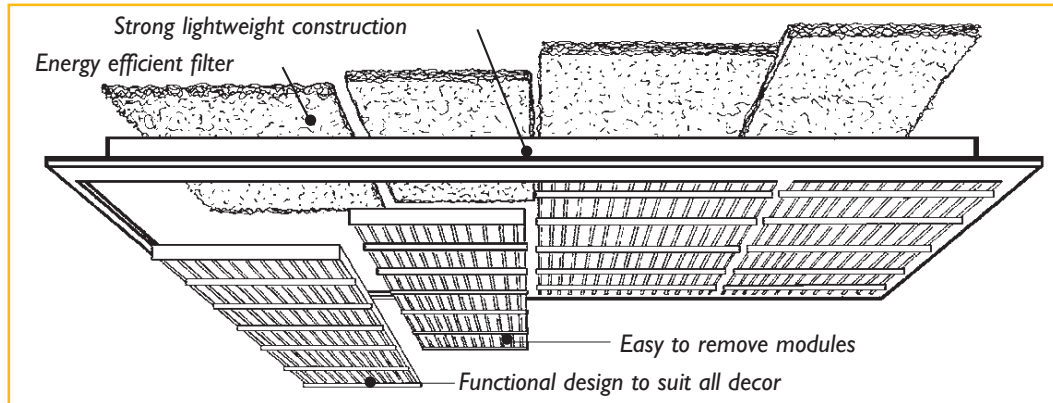

FEATURES

- Easy clean removable cores
- Washable filters
- ABS non corrosive material
- Dishwasher safe
- Simple fixing method
