

SILENT AIR T / BAR DIFFUSER

DESCRIPTION

DESCRIPTION

The unique cellular design of the SILENT AIR ceiling diffuser is the key to smooth turbulence free air diffusion. The design allows for an exceptionally smooth air path where above average air volumes are required, providing low turbulence and reduced noise levels.

Designed specifically for commercial high rise application, the SILENT AIR diffuser has a stylish appeal which integrates with all ceiling styles, blending perfectly with modern interior designs and lighting decor. A strong lightweight construction with snap in diffuser quadrants, the SILENT AIR diffuser allows easy access for cleaning in high traffic areas. Made from ABS material, the SILENT AIR diffuser will not fade, stain or corrode and is ideally suited for installation in tropical areas.
