

CIRCULAR SWIRL DIFFUSER

TYPE: WR200 • WR210 • WR230

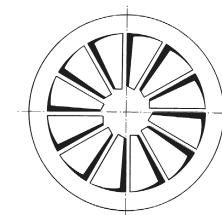

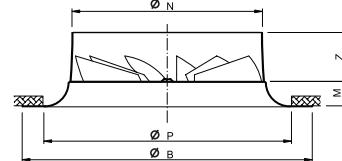

Installation dimensions

WR210

WR230

Application

The swirl diffuser type WR200 is used for the supply of cooled and heated air in facilities such as offices, shopping centres, schools, ...

Diffuser for ceiling or exposed duct mounting. The diffuser is equipped with fixed vanes in a round frontsheets. A high induction is obtained by the exceptional swirl discharge, which makes them very suitable for VAV application from 100 % down to 25 %. A downwards inclined swirl is obtained in the flat version WR200, when fitted with the diffusion collar WR220 a horizontal swirl is obtained.

Technical information

Characteristics:

- available with the dimensions 100, 125, 160, 200, 250, 315, 400 and 500 mm
- 2,4 < installation height < 4 m
- diffuser with central screw fixing that can be dismantled from plenum or transition piece.
- diffuser without central screw fixed to plenum or transition piece.

Size	ØN	ØA	ØB	M	ØP	Z

500	498	700	700	70	620	50

Δ P = minimal ceiling opening. All dimensions in mm.

Construction:

- diffuser; steel, painted white (RAL 9010)
- optional insulated plenum; galvanised steel sheet
- provided with mounting eyes (\varnothing 7 mm), mounting straps available upon request

CIRCULAR SWIRL DIFFUSER

TYPE: WR200 • WR210 • WR230

Specifications description

Example:

Circular steel swirl diffuser with fixed vanes in a round frontsheets and diffusion collar. Complete with side entry plenum and damper.
The diffuser is painted white (RAL 9010)

Type: WR231S
size ... mm

Accessories

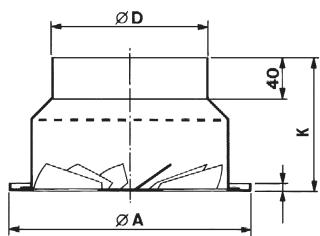

GR003: mounting support for central screw fixing (only for WR210 and WR230)

Options

- WR200: Flat swirl diffuser
- WR200S: Flat swirl diffuser and plenum with side entry
- WR200T: Flat swirl diffuser with transition piece, top entry
- WR210: Flat swirl diffuser with central screw fixing
- WR210T: Flat swirl diffuser with central screw fixing and transition piece, top entry
- WR210S: Flat swirl diffuser with central screw fixing and plenum with side entry
- WR211S: Flat swirl diffuser with central screw fixing, plenum with side entry and damper
- WR220: Swirl diffuser with diffusion collar
- WR220S: Swirl diffuser with diffusion collar and plenum with side entry
- WR220T: Swirl diffuser with diffusion collar and transition piece, top entry
- WR230: Swirl diffuser with diffusion collar and central screw fixing
- WR230T: Swirl diffuser with diffusion collar, with central screw fixing and transition piece, top entry
- WR230S: Swirl diffuser with diffusion collar, central screw fixing and plenum with side entry
- WR231S: Swirl diffuser with diffusion collar, central screw fixing and damper in inlet spigot

ROUND SWIRL DIFFUSER WITH TRANSITION PIECE

TYPE: WR230 • WP270T

Installation dimensions

WR230 + WP270T - size 100 mm

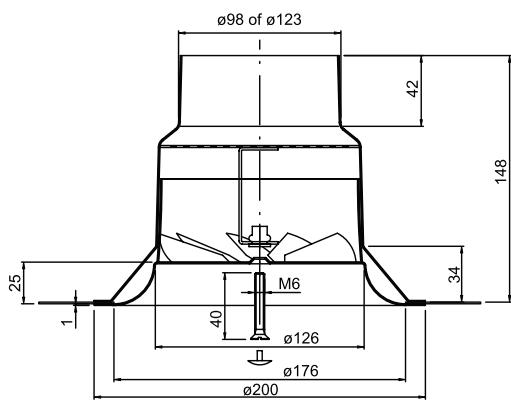

WR230 with outside dimension 140 or 160 mm
WP270T with connection diameter 80 or 100 mm

Application

The swirl diffuser type WR230 is used for the supply of cooled and heated air in facilities such as offices, shopping centres, schools, ...

WR230 + WP270T - size 125 mm

WR230 with outside dimension 200 mm
WP270T with connection diameter 100 or 125 mm

Diffuser for ceiling or exposed duct mounting. The diffuser is equipped with fixed vanes in a round front sheet. A high induction is obtained because of the exceptional swirl discharge, which makes them very suitable for VAV applications from 100 % down to 25 %.

The swirl diffusers are universally applicable. Thanks to the simple assembly to the transition piece and the restricted outer dimensions, this grating is ideal for the supply of fresh air in cooling ceilings.

Technical information

Characteristics:

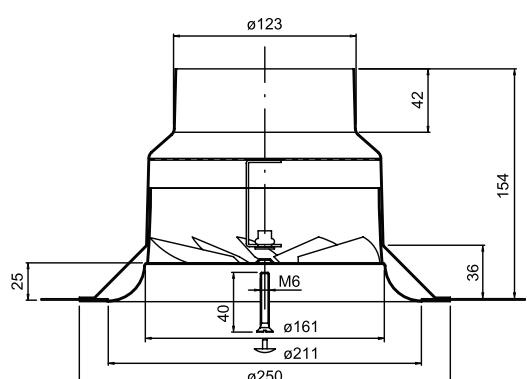

- available with outer dimensions 100, 125 and 160 mm (see drawings)
- transition piece available with 3 connection diameters: 80, 100 and 125 mm
- 2,4 m < installation height < 4 m
- diffuser with central screw fixing which can be dismantled from plenum or transition piece
- suitable for ceilings of 1 to 20 mm thick

Construction:

WR230:
steel painted white RAL 9010

WP270T:
galvanised unpainted steel

WR230 + WP270T - size 160 mm

WR230 with outside dimension 215 or 250 mm
WP270T with connection diameter 125 mm

All dimensions in mm

ROUND SWIRL DIFFUSER WITH TRANSITION PIECE

TYPE: WR230 • WP270T

Specifications description

Example:

Circular steel swirl diffuser with fixed vanes for small air volumes. Provided with central screw with cap and transition piece.

The diffuser is painted white (RAL 9010)

Type: WR230 + WP270T
Size ... mm

Delivery possibilities

WR230:

round swirl diffuser with central screw and cap.

WP270T:

transition piece

Fixing

Easy fixing using the central screw on the transition piece WP270T.

The ceiling can be clasped between the grill and the transition piece.

CIRCULAR SWIRL DIFFUSER

TYPE: WR250

Installation dimensions

Size	Ø A	Ø D	Ø P	B	C
63	98	61	91	15	40
80	140	78	115	17	50
100	160	98	130	17	50
125	200	123	170	25	30

Δ P = minimal ceiling opening. All dimensions in mm.

Application

The swirl diffuser type WR250 is used for the supply of cooled and heated air in facilities such as offices, shopping centres, schools, ... Diffuser especially designed for system ceiling mounting. The friction springs and the small overall dimension (ΔA) offer extremely easy mounting and a perfect integration in system ceilings. Suitable for ceiling sheets with thickness between 1,5 and 20 mm. Fixed horizontal air pattern.

Technical information

Construction:

- steel, painted white (RAL 9010)
- available with 4 dimensions 63, 80, 100 and 125 mm

Selection table - supply

Size	qv (m³/h)	Δpt (Pa)	L _w (NR)	L _T (m)
63	25	63	35	0,80
